## SHOP BY CATEGORY

 <p>Ethnic Wear <b>40-50% OFF</b> <a href="#">Shop Now</a></p>	 <p>Casual Wear <b>20-30% OFF</b> <a href="#">Shop Now</a></p>	 <p>Watches <b>50-60% OFF</b> <a href="#">Shop Now</a></p>	 <p>Sportswear <b>30-40% OFF</b> <a href="#">Shop Now</a></p>	 <p>Footwear <b>25-35% OFF</b> <a href="#">Shop Now</a></p>
				

## Day 05:

### BMI Calculator

Enter Weight (kg):

Enter Height (cm):

Calculate

Result will be displayed here.

### KM to Miles Converter

Enter Distance (in KM):

Convert to Miles

2 km is equal to 1.24 miles.

## Addition of 2 Numbers

Enter Number 1:

3

Enter Number 2:

2

Add

Sub

Mul

Div

Division of 3 & 2 is 1.5.

Result: 12

## BMI Calculator

Enter Weight (kg):

70

Enter Height (m):

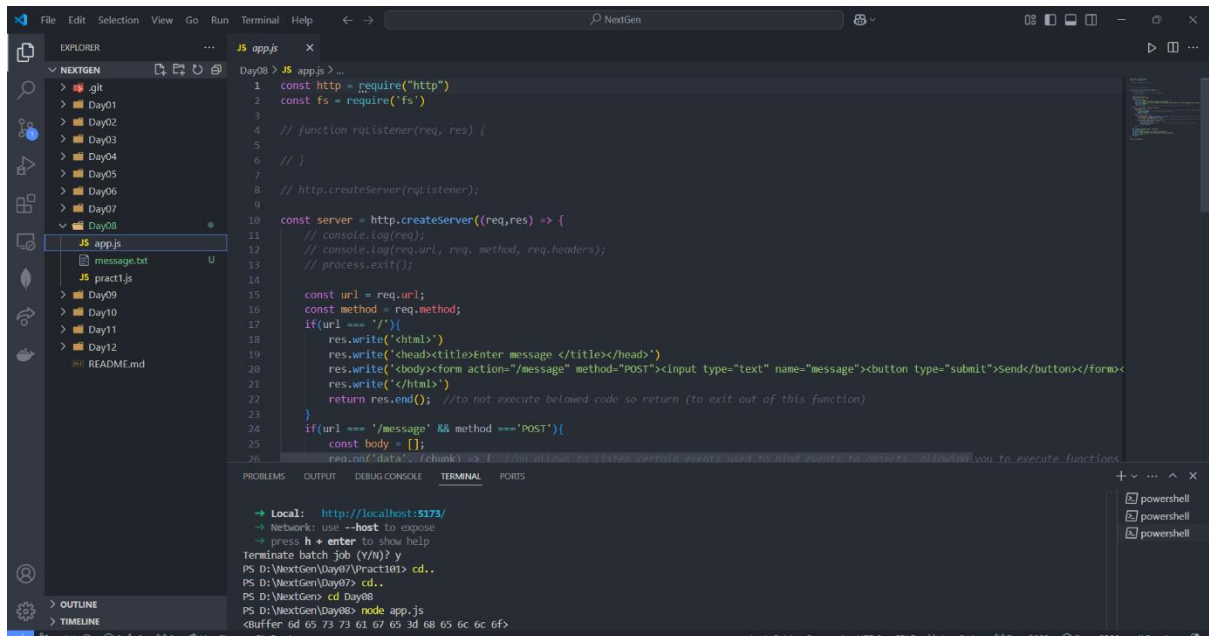

1.7

Calculate

Your BMI is 24.22. You are normal weight.

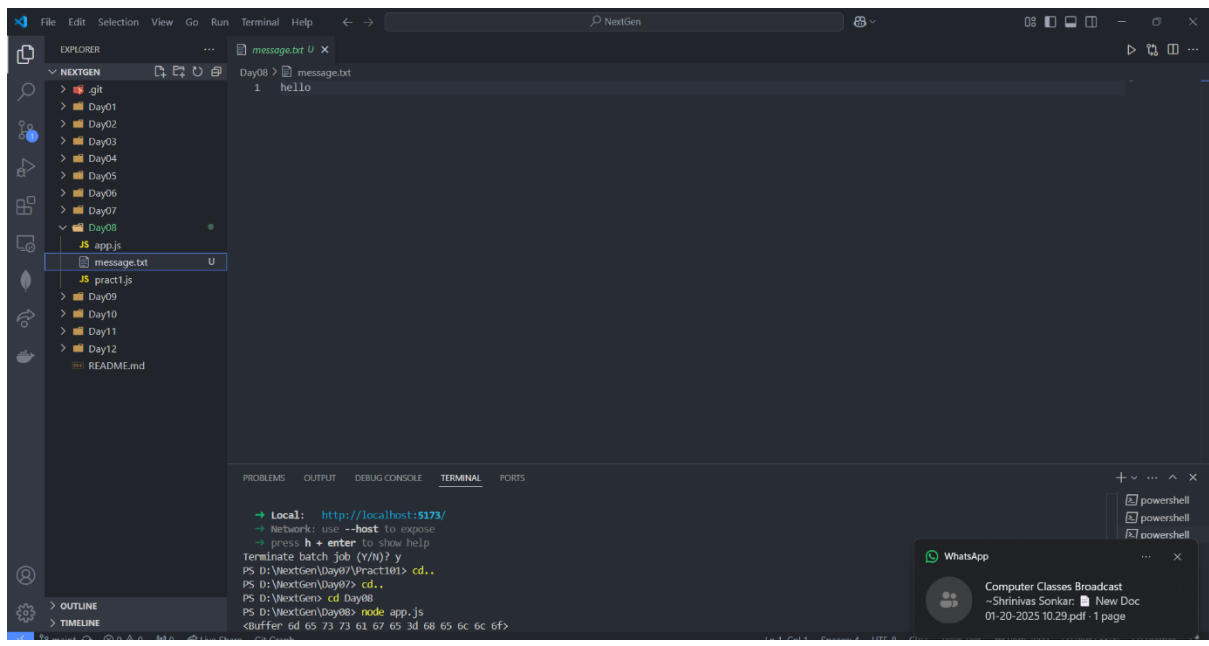

# Day 8:

```
1 const http = require("http")
2 const fs = require("fs")
3
4 // function requestListener(req, res) {
5 //
6 // }
7
8 // http.createServer(requestListener);
9
10 const server = http.createServer((req, res) => {
11   // console.log(req);
12   // console.log(req.url, req.method, req.headers);
13   // process.exit();
14
15   const url = req.url;
16   const method = req.method;
17   if (url === '/') {
18     res.writeHead(200, { 'Content-Type': 'text/html' });
19     res.write('<head><title>Enter message </title></head>');
20     res.write('<body><form action="/message" method="POST"><input type="text" name="message"><button type="submit">Send</button></form>');
21     res.write('</body>');
22     return res.end(); //to not execute below code so return (to exit out of this function)
23   }
24   if (url === '/message' && method === 'POST') {
25     const body = [];
26     req.on('data', (chunk) => { //from ultra to listen certain events used to bind events to objects allowing you to execute functions
27       body.push(chunk);
28     });
29     req.on('end', () => {
30       const message = body.join('');
31       fs.appendFile('message.txt', message, (err) => {
32         if (err) console.log(err);
33         console.log('Message stored: ', message);
34       });
35       res.writeHead(200, { 'Content-Type': 'text/html' });
36       res.write('<h1>Message received</h1>');
37       res.end();
38     });
39   }
40 })
41
42 server.listen(5173, () => {

# Day 9:

# Day 10:

The screenshot shows the MongoDB Compass application interface. The left sidebar displays the 'Connections' panel with a tree view of databases and collections. The 'test' database is selected, and the 'movie\_dats' collection is highlighted. The main panel shows the 'Documents' tab with a list of movie documents. The query bar at the top contains the text 'Type a query: { field: 'value' } or [Generate query](#)'. Below the query bar, there are buttons for 'ADD DATA', 'EXPORT DATA', 'UPDATE', and 'DELETE'. The document list shows three entries, each with a JSON object containing movie details like title, year, rating, and genre. The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 21:08 on 24-01-2023.
